

Diallo Murder Signals Open Season
by: Del Jones

Let us demonstrate some maturity here. The murdering swine that slaughtered our brother were doing their appointed task when they killed young Amadou Diallo. We are the ones playing games, we are the ones we should be mad at. How many thousands of times have we been enraged by the street lynchings we have experienced?

Ya see, between murders and after the paint on our protest signs dry up we do nothing, nothing, nothing. Even though we know there is a big difference between cops in the movies and television and those deadly barbaric pigs who are the first line of defense for a system that despises us, we expect justice! They are in the process of annihilating us... and we expect justice... we get ... genocide!

We have been reduced to simple minded ambulance chasers waiting for the next "official" murder to go down. Don't get me wrong, I admire those who have the love and who protest on our behalf... much respect. We even need more to join the ranks of our street statements. My problem lies with our inactivity on all other fronts to organize ourselves to make the enemy feel our wrath whenever we are displeased with their obvious acts of war.

An unorganized people are a victimized people. We have the numbers, economical power, creativity and courage to make them pay on every level. Yet, we remain disorganized at the gates of Babylon shaking our fist and screaming into the wind...

Make 'em feel it, yo... on every level make them feel it... it can't continue to be business as usual after the body bags are filled and the blood mopped up. Make 'em feel it, yo... continue to organize economic boycotts, organize internal protection against all criminals operating in the 'Hood... Make them feel the discomfort we feel in their space and organize to respond in kind if the enemy doesn't stop its aggression against our besieged people.

We are in the final phase of the Afrikan Holocaust and as the trap closes around us we must organize ourselves by joining the ranks of positive organizations and also by creating new ones above and underground.

In the final phase of the Afrikan Holocaust we are dying all over the globe from the terror of white supremacy. Biological warfare (Crack, AIDS, Ebola, Inoculations etc.) are killing us by the millions. Economically, they continue to strangle us by inspiring and sponsoring civil war all over the Afrikan Continent as they maintain neo-colonial regimes all over the world. The result? Millions die in warfare, of hunger, and disease as our reality is retarded and we are wasting away.

Our land, labor and resources are stolen and used against us as the Holocaust continues. Meanwhile, here in the United Snakes we are seen as a useless population because they don't need our labor any more, we have already built their temples of doom.

Over 2,000,000 people are locked down. In short our potential army has been locked away where we can not politicize them. Those with courage are captives after being criminalized by Amerikkkan culture and the government produced dope-jam! They are the new-Slaves as their captivity is now used as a profitable endeavor by major corporations. Meanwhile, their labor is stolen as the trap closes.

Many over look the war against Black immigrants all over the white world. Consequently, they miss another aspect of the terror the community feels as they carted the bloody body of brother Amadou away. Hell, they don't

even want the Blacks that are already here much less new ones. It is a call for us to unite because all of us are guilty of Amerikkka's number One crime ... living while Black!

We are under siege like never before and the predictable verdict of the "official murder" should not have surprised any one. Yet, we are shocked because we have yet to understand they are turning up the heat and our responses are slow 'cause our analysis is lacking.

And as the global body count mounts, as the destabilization continues and as our people attempt to get lost in Jerry Springer and Play Stations, we are being annihilated. Our outrage was the opposite reaction of their police and military that views the current climate as fertile ground to continue to contain and eliminate us.

And the blood-ah-run. We must, organize on every level, we are a traumatized people who need to move to tighten our internal dynamics in very way. As they intensify we must intensify, if we do not respond they will continue to overwhelm us. We must be working for our community everyday. "Blessed are those who struggle."

For those of you who think "Community Town Watch" programs are to protect us, think again. All social agencies are collecting data on us to supply the police and military with information to be used against we. We've got a problem as the body count escalates in every corner of this nation. If you don't think we have something in common with the rest of the global Afrikan Family think again. Out of all the things we have in common, one stands out clearly... We are being Annihilated... Unite or die!

**It's a Privilege to be Afrikan,
but Afrikans must Unite!**
